

Steven Matos

Full Stack Developer

Project Experience

Groa

React | Redux | Material.UI | Node.js | Knex | Postgres

groa.us | github.com/Lambda-School-Labs/Groa-fe
| github.com/Lambda-School-Labs/Groa-be

- Developed on a cross functional team of 10 to work on this open source project
- implemented material.ui into the project to match UX design work.
- Applied Back-End skills to refactor the API to match Postgres changes on the datatables.

Rent-My-Stuff

React | Material UI | Redux

rent-my-stuff.netlify.com | github.com/UseMy-techstuff/FE

- Applied Front-End Skills to develop a small web application to rent out electronic equipment.
- Built out with a team of 4 members within 4 days.
- Utilized Redux to manage state within the web application.
